PROFILE

Python Full Stack Developer with hands-on experience building responsive, user-focused web applications using Python (Django), JavaScript, HTML, CSS, and MySQL. Through a full-stack internship and academic projects, I implemented backend APIs, integrated databases, and connected frontend interfaces to deliver clean, maintainable solutions. I bring strong problem-solving, debugging, and code-optimization skills, a commitment to writing readable code, and a growth mindset eager to contribute as an intern or junior developer.

EMPLOYMENT HISTORY

Jul 2025 — Mar 2026   **Python Full Stack Developer Intern (Trainee), thefuturalabs**   Kozhikode
Completed hands-on training in full-stack web development, focusing on building dynamic and responsive web applications using Python and modern frontend technologies. Worked on practice projects to gain experience in backend development, database integration, and user interface design. Developed a strong understanding of web development workflows, problem-solving, and collaborative learning in a professional environment.

EDUCATION

Jun 2022 — May 2025   **Baithul Izza Arts and Science College**   Kozhikode
| 2022 — 2025
Affiliated to: University of Calicut
• Completed Bachelor of Computer Applications with a focus on software development, database management, and web technologies. Gained hands-on experience in programming languages such as Python and JavaScript, and frameworks like Django. Developed practical skills through project work and assignments, building a strong foundation in full-stack web development, problem-solving, and software engineering principles.

Jun 2020 — Mar 2022   **Chakkalakkal Higher Secondary School**   Kozhikode
Completed higher secondary education with a specialization in Commerce and Computer Application. Gained foundational knowledge in business studies, accounting principles, and computer fundamentals.

SKILLS

Problem-solving & Logical Thinking	Python, JavaScript, HTML, CSS
Debugging & Code Optimization	React.js (Basic), Bootstrap, Responsive Design
Project Development & Collaboration	MySQL

EXTRACURRICULAR ACTIVITIES

Building Personal Web Projects
I enjoy creating and experimenting with web applications using Python and Django. These projects help me improve my full-stack development skills, problem-solving abilities, and understanding of real-world applications.

Badminton
Actively playing badminton has taught me discipline, focus, and teamwork. It helps me stay physically and mentally fit, which supports productivity and creativity in my work.

Photography
Passionate about photography, I capture creative visuals that enhance my observational skills and attention to detail.
